3. DETAILS OF THE OFFERS

3.1 Background

On 24 June 2022 the Company announced a capital raising by way of a security purchase plan involving the issue of Shares (**SPP Shares**) and attaching Options (**SPP Options**). The security purchase plan followed on from the announcement a placement of Shares (**Placement Shares**) and attaching Options (**Placement Options**) on the same terms to institutional investors (**Placees**).

The Placement Shares have been issued to the Placees. The Placement Options are on the same terms as the SPP Options and the Company will seek quotation of the Placement Options and SPP Options as one class. The Placement Options are thereby intended to be freely tradeable and will be issued under this Prospectus in order to overcome any secondary trading Corporations Act restrictions.

ASIC Corporations (Share and Interest Purchase Plans) Instrument 2019/547 ("**ASIC Instrument 2019/547**") allows a company to undertake a share purchase plan without the need for issuing a prospectus, so long as the share purchase plan complies with certain conditions. The Company is unable to rely on ASIC Instrument 2019/547 to undertake the SPP Offer as ASIC Instrument 2019/547 does not allow for the issue of options under a share purchase plan.

By reason of the restrictions in ASIC Instrument 2019/547, the SPP Offer (of both SPP Shares and SPP Options) is being made under this Prospectus to overcome any offer and secondary trading Corporations Act restrictions. The Company intends to undertake the SPP Offer, to the extent that it is practicable, in accordance with the terms and conditions for share purchase plans expressed in ASIC Instrument 2019/547.

3.2 The SPP Offer

By this Prospectus, the Company offers for subscription up to 22,222,223 SPP Shares to Eligible Shareholders at an issue price of 9 cents per SPP Share together with up to 22,222,223 free SPP Options on the basis of 1 free SPP Option for every 1 SPP Share subscribed for by Eligible Shareholders pursuant to the SPP Offer.

Up to approximately \$2,000,000 will be raised by the issue of the SPP Shares pursuant to the SPP Offer. Eligible Shareholders will be entitled to apply for a maximum of \$30,000 worth of SPP Shares under the SPP Offer.

There is no brokerage, commissions or other participation costs payable by Eligible Shareholders who subscribe for SPP Shares and SPP Options under the SPP Offer.

No funds will be raised from the issue of the SPP Options pursuant to this Prospectus as the SPP Options are issued for free attaching to the SPP Shares.

The SPP Options offered under this Prospectus will be issued on the terms set out in Section 6.2 of this Prospectus.

The SPP Shares and all of the Shares issued upon the future exercise of the SPP Options offered under this Prospectus will rank equally with the Shares on issue at the date of this Prospectus. Please refer to Section 6.1 for further information regarding the rights attaching to Shares.

3.3 The Placement Options Offer

By this Prospectus, the Company offers for issue a total of 44,444,445 Placement Options to the Placees on the basis of 1 free Placement Option for every 1 Placement Share subscribed for by a Placee.

Only Placees can apply for Placement Options by the Placement Options Offer Application Form. The Company will contact the Placees in this regard.

No funds will be raised from the issue of the Placement Options.

The Placement Options will be issued on the terms set out in Section 6.2 of this Prospectus.

3.4 **Unconditional Offers**

The SPP Offers and the Placement Options Offer are not conditional. The Company will use its existing placement capacity under Listing Rules 7.1 and 7.1A to issue the SPP Shares, SPP Options, any SPP Shortfall Securities and the Placement Options. Directors and Director controlled entities that are Shareholders cannot participate in the SPP Offer.

3.5 **Minimum subscription**

There is no minimum subscription for the Offers.

3.6 **Applications under the SPP Offer**

An application for SPP Shares and SPP Options under the SPP Offer must be made on the SPP Application Form. Pursuant to the SPP Offer, Eligible Shareholders may apply for any amount from a minimum of \$2,000 up to a maximum of \$30,000 worth of SPP Shares by completing the SPP Application Form in accordance with the instructions outlined on the SPP Application Form. Applications pursuant to the SPP Offer must only be made by Eligible Shareholders.

3.7 **Shareholders eligible to participate under the SPP Offer**

Eligible Shareholders

Holders of Shares that are registered with an Australian or New Zealand address at the Record Date, and that are not persons in the United States or acting for the account or benefit of persons in the United States, are eligible shareholders excluding Directors and Director controlled entities that are Shareholders (**Eligible Shareholders**) and may participate in the SPP Offer. Due to foreign securities laws, it is not practical for shareholders resident in other countries to be offered the opportunity to participate in the SPP Offer.

The Record Date is 7pm (AEST) on 23 June 2022.

Each Eligible Shareholder participating in the SPP Offer represents and warrants that it:

- is not in the United States, and is not applying under the SPP Offer for or on behalf of a person in the United States;
- acknowledges that the SPP Shares and SPP Options (including the underlying Shares) to be issued under the SPP Offer have not, and will not be, registered under the US Securities Act or the securities laws of any state or other jurisdictions in the United States, and accordingly, the SPP Shares and SPP Options (including the underlying Shares) may not be offered, sold or otherwise transferred in the United States except in accordance with an available exemption from, or in a transaction not subject to, the registration requirements of the US Securities Act and any other applicable securities laws;
- represents and warrants that it has not sent and will not send any materials relating to the SPP Offer to any person in the United States or elsewhere outside Australia and New Zealand;

- if it is acting as a nominee or custodian, each beneficial holder on whose behalf it is making an application is resident in Australia or New Zealand, and it has not sent and will not send, this Prospectus or any information related to the SPP Offer to any person in the United States or elsewhere outside Australia and New Zealand

Joint holders

Where two or more persons are recorded in the register as jointly holding Shares, they are taken to be a single registered holder and the SPP Offer is made to them jointly.

Custodians, trustees and nominees

If you are an Eligible Shareholder and hold Shares as a custodian (as defined in ASIC Instrument 2019/547) (refer below) (**Custodian**), you may apply for up to the maximum of SPP Shares for each beneficiary for whom you act as custodian provided you annex to your SPP Application Form a certificate to the Company (**Custodian Certificate**) with the following information:

- (a) that you or another interposed custodian held Shares on behalf of one or more other persons who are resident in Australia or New Zealand (each a **Participating Beneficiary**) at 5:00pm (Perth time) on the Record Date who have subsequently instructed you to apply for SPP Shares under the SPP Offer on their behalf;
- (b) the number of Participating Beneficiaries and their names and addresses;
- (c) the number of Shares that you hold on behalf of each Participating Beneficiary;
- (d) the dollar amount of SPP Shares that each Participating Beneficiary has instructed you, either directly or indirectly through another custodian, to apply for on their behalf;
- (e) that the amount for SPP Shares applied under the SPP Offer for each Participating Beneficiary for whom you act plus the application amount for any other Shares issued to you as custodian for that Participating Beneficiary under any arrangement similar to the SPP Offer in the prior 12 months does not exceed \$30,000;
- (f) that a copy of the written offer document was given to each beneficiary; and
- (g) where you hold shares on behalf of a beneficiary indirectly, through one or more interposed custodians, the name and address of each interposed custodian.

For the purposes of the SPP Offer, and consistent with ASIC Instrument 2019/547, you are a "custodian" if you are a registered holder that:

- (b) is exempt from the requirement to hold an Australian financial services licence for the provision of a custodial or depository service;
- (c) is a trustee of a self-managed superannuation fund or a superannuation master trusts;
- (d) is a responsible entity of IDPS-like schemes;
- (e) is noted on the Company's register of members as holding the shares on account of another person.

If you hold Shares as a trustee or nominee for another person or persons but are not a Custodian as defined above, you cannot participate for beneficiaries in the manner described above.

Custodians should request a Custodian Certificate when making an application on behalf of Participating Beneficiaries. To request Custodian Certificate and if you would like further information on how to apply, you should contact the Company's share registry during normal business hours.

A Custodian, nominee or trustee holding Shares for the benefit of a person in the United States may not apply for SPP Shares and SPP Options (including the underlying ordinary shares) under this SPP Offer for that person.

The Company reserves the right to reject any application for SPP Shares to the extent it considers that the application (whether alone or in conjunction with other applications) does not comply with these requirements.

3.8 **SPP Shortfall Offer**

Any SPP Shares and SPP Options not taken up pursuant to the SPP Offer (**SPP Shortfall Securities**) will form the Shortfall Offer (**Shortfall Offer**) which is made by the Company to any investors by way of this Prospectus who are not related parties. In the event of shortfall, investors will be identified by the Company and requested to apply under the Shortfall Offer by a Shortfall Securities Application Form. Applicants for SPP Shortfall Securities may therefore not be a Shareholder. The Shortfall Offer will be conducted in compliance with all applicable securities laws.

The Shortfall Offer is a separate offer made pursuant to this Prospectus and will remain open for up to 3 months following the Closing Date for the SPP Offer.

The Company will issue 1 SPP Option for every 1 SPP Share subscribed for by an investor under the Shortfall Offer.

There is no maximum limit on the number of SPP Shares (with free attaching SPP Options) that an investor may apply for under the Shortfall Offer.

The Directors reserve the right to issue SPP Shortfall Securities at their absolute discretion and may issue to an applicant a scaled back, lesser number of, or no, SPP Shortfall Securities than the number for which the applicant applies pursuant to the Shortfall Securities Application Form.

3.9 **Payment for securities under the SPP Offer**

Payment is to be by BPAY. Please follow the instructions on the SPP Application Form. You can only make a payment via BPAY if you are the holder of an account with an Australian financial institution that supports BPAY transactions. Please note that should you choose to pay by BPAY:

It is your responsibility to ensure that your BPAY payment is received by the share registry by no later than 5.00pm (WST) on the Closing Date. You should be aware that your financial institution may implement earlier cut-off times with regards to electronic payment and you should therefore take this into consideration when making payment.

Any application moneys received for more than your final allocation of Shares will be refunded. No interest will be paid on application moneys received or refunded.

5. RISK FACTORS

5.1 Introduction

An investment in the securities the subject of this Prospectus is highly speculative. The Company is a resource exploration and development company with a number of Projects in Australia at various stages of exploration and development.

The resource exploration and development activities of the Company are subject to various risks that may impact on the future performance of the Company. The following is a non-exhaustive list of the risks that may have a material effect on the financial position and performance of the Company and the value of its securities, as well as the Company's exploration, development and any mining activities and an ability to fund those activities.

The specific risks below are some of the risks to the Company of a specific nature by reason of its proposed involvement in the resources industry. The general investment risks below are some of the risks to the Company of a general economic nature.

5.2 Specific risks

Future capital needs and additional funding

The Company's ability to raise capital (equity or debt) within an acceptable time, of a sufficient amount and on terms acceptable to the Company will vary according to a number of factors, including the success of the exploration and development programs, feasibility studies, stock market and industry conditions and the price of relevant commodities and exchange rates.

No assurance can be given that future funding will be available to the Company on favourable terms (or at all). If adequate funds are not available on acceptable terms the Company may not be able to further develop its Projects and it may impact on the Company's ability to continue as a going concern.

Results of Studies

Subject to the results of exploration and testing programs to be undertaken, the Company may progressively undertake a number of studies in respect to the Projects. These studies may include scoping, prefeasibility and definitive bankable feasibility studies.

Such studies need to be completed within parameters designed to determine the economic feasibility of the Projects within certain limits. There can be no guarantee that any of the studies will confirm the economic viability of the Projects or the results of other studies undertaken by the Company (eg the results of a feasibility study may materially differ to the results of a scoping study).

Even if a study confirms the economic viability of a Project, there can be no guarantee that the Project will be successfully brought into production as assumed or within the estimated parameters in the feasibility study (eg operational costs and commodity prices) once production commences. Further, the ability of the Company to complete a study may be dependent on the Company's ability to raise further funds.

Exploration

The Company intends to undertake further exploration at its Projects which is a high risk undertaking.

There can be no assurance of success from the Company's exploration activities.

Development and mining

Possible future development of a mining operation at any of the Company's Projects is dependent on a number of factors including, but not limited to, failure to acquire and/or delineate economically recoverable ore bodies, unfavourable geological conditions, failing to receive the necessary approvals from all relevant authorities and parties, unseasonal weather patterns, unanticipated technical and operational difficulties encountered in extraction and production activities, mechanical failure of operating plant and equipment, unexpected shortages or increases in the price of consumables, spare parts and plant and equipment, cost overruns, risk of access to the required level of funding and contracting risk from any third parties providing essential services.

In the event that the Company commences production, its operations may be disrupted by a variety of risks and hazards which are beyond its control, including environmental hazards, industrial accidents, technical failures, labour disputes, unusual or unexpected rock formations, flooding and extended interruptions due to inclement or hazardous weather conditions and fires, explosions and other accidents.

Commodity price volatility

The Company is seeking to develop Projects which will be reliant on the prices of various commodities including gold and copper.

Commodity prices fluctuate and are affected by numerous factors beyond the control of the Company. These factors include worldwide and regional supply and demand for commodities, forward selling by producers and production cost levels, general world economic conditions and the outlook for interest rates, inflation and other economic factors on both a regional and global basis. These factors may have a positive or negative effect on the Company's exploration, project development and production plans and activities, together with the ability to fund those plans and activities.

Reliance on key personnel

The Company's success largely depends on the core competencies of its Directors and any management and their familiarisation with, and ability to operate in, the resource and development industries.

Richmond Vanadium Project interest

As announced on 15 June 2022, the Company is currently a 25% shareholder in a special purpose vehicle company holding the Richmond Vanadium Project in central north Queensland. The special purpose vehicle intends to undertake an initial public offer prospectus fundraising and list on ASX. HRZ intends to in-specie distribute a portion of its shares in the special purpose vehicle and HRZ Shareholders will have a priority entitlement in the public offer fundraising.

The success of the initial public offer fundraising is subject to market conditions and risk. If the initial public offer fundraising is not successful, the development of the Richmond Vanadium Project and its value, may be jeopardised.

Resource and Reserve estimates

Mineral Resource and Ore Reserve estimates are expressions of judgment based on knowledge, experience and resource modelling. As such, Resource and Reserve estimates are inherently imprecise and rely to some extent on interpretations made.

Additionally, Resource and Reserve estimates may change over time as new information becomes available. If the Company encounters mineralisation or geological formations different

from those predicted by past drilling, sampling and interpretations, Resource and Reserve estimates may need to be altered in a way that could adversely affect the Company's operations.

Title

All of the tenements or licences in which the Company has or may earn an interest in will be subject to applications for renewal or grant (as the case may be). The renewal or grant of the terms of each tenement or licence is usually at the discretion of the relevant government authority.

Additionally, tenements are subject to a number of State and Territory specific legislative conditions including payment of rent and meeting minimum annual expenditure commitments. The inability to meet these conditions could affect the standing of a tenement or restrict its ability to be renewed.

If a tenement or licence expires, is not renewed or granted, the Company may suffer significant damage through loss of the opportunity to develop and discover any mineral resources on that tenement.

Native title and land access

The Native Title Act 1993 (Cth) recognises and protects the rights and interests in Australia of Aboriginal and Torres Strait Islander people in land and waters, according to their traditional laws and customs. There is a significant uncertainty associated with native title in Australia and this may impact upon the Company's operations and future plans.

It is important to note that the existence of a native title claim is not an indication that native title in fact exists to the land covered by the claim, as this is a matter ultimately determined by the Federal Court. If native title rights do exist, the ability of the Company to gain access to tenements (through obtaining consent of any relevant landowner) or to progress from the exploration phase to the development and mining phases of operations may be adversely affected.

The Company must also comply with Aboriginal heritage legislation requirements which require heritage survey work to be undertaken ahead of the commencement of mining operations.

Environmental

The Company's Projects are subject to laws and regulations regarding environmental matters. The Governments and other authorities that administer and enforce environmental laws and regulations determine these requirements. As with all exploration projects and any subsequent mining operations, the Company's activities are expected to have an impact on the environment. The Company intends to conduct its activities in an environmentally responsible manner and in accordance with applicable laws.

The cost and complexity of complying with the applicable environmental laws and regulations may prevent the Company from being able to develop potentially economically viable mineral deposits.

Further, the Company may require additional approvals from the relevant authorities before it can undertake activities that are likely to impact the environment. Failure to obtain such approvals will prevent the Company from undertaking its desired activities. The Company is unable to predict the effect of additional environmental laws and regulations which may be adopted in the future, including whether any such laws or regulations would materially increase the Company's cost of doing business or affect its operations in any area.

COVID-19 pandemic risk

The COVID-19 pandemic has and, until development of a vaccine, may continue to significantly adversely affect world economic conditions including economic conditions for companies with projects in Australia.

Various governments have imposed restrictions on the movement of people and goods as a measure to seek to slow and contain the spread of the COVID-19 virus. Social distancing measures have and may continue to be implemented. Various stages of restriction could be implemented.

Development of the Company's Projects may be delayed or curtailed as a result of the COVID-19 pandemic or measures to contain it.

Insurance

The Company may maintain insurance within ranges of coverage that it believes to be consistent with industry practice and having regard to the nature of activities being conducted. However, it is not always possible to cost-effectively insure against all risks associated with such activities. The Company may decide not to take out insurance against certain risks as a result of high premiums or for other reasons. Should liabilities arise on uninsured risks, the Company's business, financial condition and results of operations and the market price of the Shares may be materially adversely affected.

Legal Proceedings

Legal proceedings may arise from time to time in the course of the business of the Company. As at the date of this Prospectus, there are no material legal proceedings affecting the Company and the Directors are not aware of any legal proceedings pending or threatened against or affecting the Company.

Climate Change Regulation

Mining of mineral resources is relatively energy intensive and is dependent on the consumption of fossil fuels. Increased regulation and government policy designed to mitigate climate change may adversely affect the Company's cost of operations and adversely impact the financial performance of the Company.

5.3 General investment risks

Securities investments and share market conditions

There are risks associated with any securities investment. The trading prices of securities trade fluctuate in response to a number of factors.

Furthermore, the stock market, and in particular the market for exploration and mining companies may experience extreme price and volume fluctuations that may be unrelated or disproportionate to the operating performance of such companies. These factors may materially adversely affect the market price of the securities of the Company regardless of the Company's operational performance. Neither the Company nor the Directors warrant the future performance of the Company, or any return of an investment in the Company.

Economic risk

Changes in both Australia and world economic conditions may adversely affect the financial performance of the Company. Factors such as inflation, currency fluctuations, interest rates, industrial disruption and economic growth may impact on future operations and earnings.

Legislative

Changes in relevant taxes, legal and administration regimes, accounting practice and government policies in Australia may adversely affect the financial performance of the Company.

6. RIGHTS ATTACHING TO SECURITIES

6.1 Rights attaching to Shares

The rights attaching to ownership of Shares in the Company (including the SPP Shares) are:

- (a) set out in the Company's Constitution; and
- (b) in certain circumstances, regulated by the Corporations Act, the Listing Rules and the general law.

A summary of the more significant rights attaching to Shares is set out below. This summary is not exhaustive nor does it constitute a definitive statement of the rights and liabilities of our Shareholders.

Voting Rights

Subject to any rights or restrictions for the time being attached to any class or classes of shares, at a general meeting of members every member has one vote on a show of hands and one vote per share on a poll. Voting may be in person or by proxy, attorney or representative.

Dividends

There is no entitlement to a dividend other than that determined by Directors from time to time. The SPP Shares will rank equally with all other issued Shares in the capital of the Company for the purposes of participation in any dividend paid out of the profits of the Company. The Directors are not anticipating paying dividends at this stage of the Company's development.

Future issues of securities

Subject to the Corporations Act and the Listing Rules, the Directors may issue, grant options over or otherwise dispose of, unissued Shares in the Company at the times and on the terms that the Directors think proper and a share may be issued with preferential or special rights.

Transfer of Shares

Subject to the Constitution of the Company, the Corporations Act, the Listing Rules and any other applicable law of Australia, shares are freely transferable.

Meetings and Notices

Each shareholder is entitled to receive notice of, and to attend, general meetings for the Company and to receive all notices, accounts and other documents required to be sent to shareholders under the Constitution, the Corporations Act or the Listing Rules.

Shareholders may requisition meetings in accordance with the Corporations Act.

Election of Directors

There must be a minimum of 3 Directors. A Director must retire from office at the third annual general meeting after the Director was elected or most recently re-elected. These retirement rules do not apply to certain appointments including the managing director. Directors appointed by the Board as additional Directors hold office until the next following annual general meeting and are then eligible for re-election.

Alteration to the Constitution

The Constitution can only be amended by a special resolution passed by at least three quarters of shareholders present and voting at the general meeting. At least 28 days written notice specifying the intention to propose the resolution as a special resolution must be given.

Listing Rules

Despite anything in the Constitution, if the Listing Rules prohibit an act being done, the act must not be done. Nothing in the Constitution prevents an act being done that the Listing Rules require to be done. If the Listing Rules require an act to be done or not to be done, authority is given for that act to be done or not to be done (as the case may be). If the Listing Rules require the Constitution to contain a provision and it does not contain such a provision, the Constitution is deemed to contain that provision. If the Listing Rules require the Constitution not to contain a provision and it contains such a provision, the Constitution is deemed not to contain that provision. If a provision of the Constitution is inconsistent with the Listing Rules, the Constitution is deemed not to contain that provision to the extent of the inconsistency.

6.2 Terms of SPP Options and Placement Options

The terms of the issue of each of the SPP Options and Placement Options are:

- (a) Each Option entitles the holder to one Share in the capital of the Company.
- (b) The Options may be exercised at any time prior to 5:00pm WST on 30 June 2025.
- (c) The exercise price of the Options is 11 cents each.
- (d) Application will be made for the Options to be quoted on ASX and the Options will be freely tradeable under Australian law.
- (e) The Company will provide to each Option holder a notice that is to be completed when exercising the Options (Notice of Exercise). Options may be exercised by the Option holder in whole or in part by completing the Notice of Exercise and forwarding the same to the Secretary of the Company to be received prior to the Expiry Date. The Notice of Exercise must, among other things, state the number of Options exercised, the consequent number of Shares to be allotted and the identity of the proposed allottee. The Notice of Exercise by an Option holder must be accompanied by payment in full for the relevant number of Shares being subscribed, being an amount of the exercise price per Share.
- (f) All Shares issued upon the exercise of the Options will rank equally in all respects with the Company's then issued Shares. The Company will apply to the ASX in accordance with the Listing Rules for all Shares pursuant to the exercise of Options to be admitted to quotation.
- (g) There are no participating rights or entitlements inherent in the Options and the holders will not be entitled to participate in new issues or pro-rata issues of capital to Shareholders during the term of the Options. Thereby, the Option holder has no rights to a change in the exercise price of the Option or a change to the number of underlying securities over which the Option can be exercised (except for a bonus issue). The Company will ensure, for the purposes of determining entitlements to any issue, that Option holder will be notified of a proposed issue after the issue is announced. This will give Option holders the opportunity to exercise their Options prior to the date for determining entitlements to participate in such issues.

- (h) If there is a bonus issue (Bonus Issue) to Shareholders, the number of Shares over which an Option is exercisable will be increased by the number of Shares which the holder would have received if the Option had been exercised before the record date for the Bonus Issue (Bonus Shares). The Bonus Shares must be paid up by the Company out of profits or reserves (as the case may be) in the same manner as was applied in the Bonus Issue, and upon issue will rank equally in all respects with the other Shares on issue as at the date of issue of the Bonus Shares.
- (i) In the event of any reconstruction (including consolidation, subdivision, reduction or return) of the issued capital of the Company, all rights of the Option holder shall be reconstructed (as appropriate) in accordance with the Listing Rules.
